

Foundation Gamma Package

BOOTSTRAP_v1.3.md

BOOTSTRAP

Version: 1.3 Status: Canonical

Purpose

Initialize and resume ADE under the authority of the ADE Constitution.

Bootstrap Sequence

1. Read the Constitution.
2. Verify repository integrity.
3. Read the Active State Snapshot.
4. Identify the current milestone.
5. Execute the milestone.
6. Produce Markdown artifacts.
7. Update CHANGELOG.
8. Create a Preservation Point when appropriate.

Repository Standards

- Repository is authoritative.
- Conversations are working sessions.
- Markdown (.md) is the canonical authoring format.
- Search before creating.
- Merge before duplicating.
- Preserve provenance.

Current Milestone

Repository Archaeology – Pass 1.

Execution Rule

Execute first. Perform designated refinement passes after working artifacts exist.

ROADMAP_v1.3.md

ADE Roadmap

Version: 1.3 Status: Canonical

Stage 1

Repository Archaeology - Census - Classification - Consolidation

Stage 2

Foundation Gamma - Revise canonical documents - Generate Markdown artifacts

Stage 3

Architecture Freeze

Stage 4

Difference Engine Engineering

Stage 5

Synthetic Validation

Stage 6

Application Layer

CHANGELOG_v1.3.md

CHANGELOG

Version: 1.3

Foundation Gamma

- Adopted repository-first workflow.
- Adopted Markdown-first standard.
- Established Repository Archaeology as current milestone.
- Adopted execution-before-refinement as default workflow.

INDEX_v1.3.md

ADE Repository Index

Version: 1.3

Core Canonical Documents

- ADE_Constitution.md
- BOOTSTRAP.md
- ACTIVE_STATE_SNAPSHOT.md
- ROADMAP.md
- CHANGELOG.md
- INDEX.md

Repository Focus

Current milestone: Repository Archaeology. Primary output: Canonical Mark-down artifacts.
