

Foundation Gamma Revision Package v1.4

ACP-0001_Foundation_Gamma_v1.4.md

ACP-0001 Foundation Gamma Constitutional Amendments

Status: Proposed

Purpose

Capture governance refinements adopted during Foundation Gamma.

Proposed Articles

1. Repository Archaeology Principle
 - Discover and classify repository knowledge before authoring new specifications.
2. Markdown Canonical Standard
 - Markdown (.md) is the canonical authoring format. Other formats are derived artifacts.
3. Execution Before Refinement
 - Produce working artifacts before scheduled refinement passes.
4. Artifact Completion Definition
 - Repository work is complete only after:
 - Canonical Markdown updated
 - Downloadable artifact generated
 - CHANGELOG updated
 - Preservation Point created when appropriate
5. Repository Engineering
 - Repository engineering is a standing discipline responsible for provenance, consolidation, and duplicate reduction.

ADE_Constitution_v1.4.md

ADE Constitution

Version: 1.4 Status: Canonical

Relationship to Other Documents

This Constitution is the supreme governance document for ADE. All operational documents derive their authority from it.

Constitutional Amendments

Durable improvements are proposed as ACPs and incorporated after review.

Repository Governance

Treat the repository as the authoritative knowledge graph. - Preserve provenance.
- Prefer canonical locations. - Avoid duplication. - Record architectural decisions.
- Keep governance synchronized.

Repository Archaeology

Repository knowledge shall be discovered, classified, and consolidated before new specifications are authored unless emergency corrections require otherwise.

Markdown Canonical Standard

Markdown (.md) is the canonical authoring format. Other document formats are generated derivatives.

Execution Before Refinement

Working artifacts shall be produced before scheduled refinement passes.

Artifact Completion Definition

Repository work is complete only when the canonical Markdown, downloadable artifact, and CHANGELOG are updated.

Operating Principles

- Optimize globally.
- Preserve before refining.
- Automate repeated work.
- Bundle compatible tasks.
- Repository first.

BOOTSTRAP__v1.4.md

BOOTSTRAP

Version: 1.4 Status: Canonical

1. Read ADE_Constitution_v1.4.md.
2. Verify repository integrity.
3. Read ACTIVE_STATE_SNAPSHOT.
4. Begin current milestone: Repository Archaeology.

5. Execute work.
6. Generate Markdown artifacts.
7. Update CHANGELOG.

ROADMAP__v1.4.md

ROADMAP v1.4

1. Repository Archaeology
2. Foundation Gamma
3. Architecture Freeze
4. Difference Engine Engineering
5. Synthetic Validation
6. Application Layer

INDEX__v1.4.md

INDEX v1.4

Core: - ADE_Constitution__v1.4.md - BOOTSTRAP__v1.4.md - ROADMAP__v1.4.md
- CHANGELOG__v1.4.md - ACP-0001_Foundation__Gamma.md

CHANGELOG__v1.4.md

CHANGELOG v1.4

Foundation Gamma

- Proposed ACP-0001.
- Revised Constitution to v1.4.
- Revised Bootstrap to require Constitution first.
- Added Repository Archaeology governance.
- Adopted Markdown-first and execution-before-refinement.
